Cement Blanket

1, Cement blanket product is a new type of waterproof, moisture-proof, fireproof, anti cracking engineering materials, favored by the majority of users. The product is a combination of traditional cement and textile fiber technology, which integrates anti-seepage and multi-functional concrete powder into the fiber skeleton. It has a three-dimensional fiber composite structure. The product has good waterproof, moisture-proof, fire-proof and durable characteristics. The design service life is 50 years. In order to extend the service life, the material can be maintained every 5-10 years, and the surface of the material is brushed A layer of cement slurry, simple method, can effectively extend the service life of the material. The product can not only save 90% of cement raw materials, but also shorten the construction period by 60%. The product is widely used in railway, highway, water conservancy, agriculture and other fields, where you want to shop. At present, the United States has purchased a large number of products and widely used.

2,Character of cement blanket:

- 1)After the product is laid and sprayed with water, the cement will solidify rapidly. After the moisture evaporates and dries, the cement carpet will be as hard and soft as the traditional carpet, and its service life is longer than that of traditional cement
- 2)Textile fiber technology is applied in the product. The textile fiber forms the skeleton and integrates a variety of composite materials to make the product waterproof, moisture-proof, fireproof and anti cracking performance. The unit weight is small and only 15kg per square meter
- 3) The construction is simple, the product is laid in the place where the construction is needed, and then spray water on it for air drying

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

4) The product has good toughness, not only can be vertically suspended, but also can be laid in the groove

5) Save 90% materials and shorten 60% construction period

3,Application: widely used in railway, highway, water conservancy, agriculture and other fields, such as mountain slope protection, ditch slope, underwater pipeline maintenance

4,Specification: 1.6*5m, 2*5m

5,Main performance parameters of Cement Blanket

ITEM	UNIT		
Density	Kg/cm3		1590±5
Quality	Kg/m2		15±1
Physical properties after 10 days of curing	Mpa	Compressive strength	40
		Elastic modulus	1500
		Bending failure stress	3.4
		Bending Young's modulus	180
structure			Three dimensional 3D structure, cement melt in the middle of fiber cloth
performance			Waterproof, moisture-proof, fireproof and anti cracking

6,Why we choose us: we have several years of mature production technology for the production and supply of cement blanket products. We adopt the advanced production process at home and abroad, and the 3D structure of the products is perfect. We can produce hundreds of thousands of square meters of products every year to supply a large number of domestic and foreign users. After the application of the product, it is well received by users. The product is produced by assembly line, the product quality is unified, no defects, free samples and construction instructions are provided for users to provide all convenience

7,Good feedback of product use effect,the products have been exported to South Korea, Russia,Pakistan

8,We are a professional supplier, who can provide customers with free product

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

technology, use and other issues

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
